

## Gulfstream's Barcode Gateway for Dynamics SL

### Retail Software List January 2022

All Barcode Gateway software prices are in U.S. Dollars and are subject to applicable taxes. Prices are subject to change without notice. Please note: The Barcode Gateway is sold through Microsoft's partners.

Software Licenses Barcode Gateway	Descriptions	Retail
Barcode Gateway Software/3 User	License includes all modules except Remote Order Entry,Blaster,JAMS interface & SFC interface.	\$5,550.00
	Add User licenses: \$1850.00 each (4 Users)	
Barcode Gateway Software/5 User	License includes all modules except Remote Order Entry,Blaster,JAMS interface & SFC interface.	\$8,250.00
	Add User licenses: \$1650.00 each (6 - 9 Users)	
Barcode Gateway Software/10 User	License includes all modules except Remote Order Entry,Blaster,JAMS interface & SFC interface.	\$14,500.00
	Add User licenses: \$1450.00 each (11 - 14 Users)	
Barcode Gateway Software/15 User	License includes all modules except Remote Order Entry,Blaster,JAMS interface & SFC interface.	\$18,750.00
	Add User licenses: \$1250.00 each (16 - 19 Users)	
Barcode Gateway Software/20 User	License includes all modules except Remote Order Entry,Blaster,JAMS interface & SFC interface.	\$21,000.00
	Add User licenses: \$1050.00 each (21 - 24 Users)	
Barcode Gateway Software/25 User	License includes all modules except Remote Order Entry,Blaster,JAMS interface & SFC interface.	\$23,750.00
	Add User licenses: \$950.00 each (26 Users & up)	
<b>ADD ON Software Licenses</b>		
Blaster Module*	Exists as an add on to the Barcode Gateway	\$5,000.00
Remote Order Entry Module*	Exists as an add on to the Barcode Gateway	\$5,000.00
Jams Interface*	Exists as an add on to the Barcode Gateway	\$5,000.00
Shop Floor Control Interface*	Exists as an add on to the Barcode Gateway	\$5,000.00
*Barcode Gateway User license purchased applies.		
<b>Yearly Maintenance &amp; Support Plans**</b>		
	Mandatory 1st. Year with initial purchase./25% of retail pricing/	
Barcode Gateway Software/3 User	25 % of retail value of Barcode Gateway software	\$1,387.50
Barcode Gateway Software/5 User	25 % of retail value of Barcode Gateway software	\$2,062.50
Barcode Gateway Software/10 User	25 % of retail value of Barcode Gateway software	\$3,625.00
Barcode Gateway Software/15 User	25 % of retail value of Barcode Gateway software	\$4,687.50
Barcode Gateway Software/20 User	25 % of retail value of Barcode Gateway software	\$5,250.00
Barcode Gateway Software/25 User	25 % of retail value of Barcode Gateway software	\$5,937.50
Remote Order Entry Module	25 % of retail value of Barcode Gateway software	\$1,250.00
Blaster Module License	25 % of retail value of Barcode Gateway software	\$1,250.00
Jams Interface	25 % of retail value of Barcode Gateway software	\$1,250.00
Shop Floor Control Interface	25 % of retail value of Barcode Gateway software	\$1,250.00
*Maintenance & Support yearly renewals		
	Required to receive upgrades - 25% of purchase List price	
<b>Customizations</b>		
Customizations of the BarcodeGateway	Are available. Please ask your dealer for more info	
Custom labels for the QL320 Printer	To customize a label to the client's specs.	\$500.00
<b>Add On Site Licenses</b>		
For separate databases	Second site license - 70% of regular retail software value.	
	More than 2 licenses - please call.	

# Gulfstream's Barcode Gateway for Dynamics SL

## Barcode Gateway Software Info

- The Barcode Gateway uses one (1) Microsoft Dynamics SL User License. In order to use the Barcode Gateway, Dynamics SL must be running, the correct database logged into on the workstation and the Barcode Gateway must also be running. Users will log into the Barcode Gateway when they power up the hand held laser scanning devices in the warehouse.
- One company in a database is accessed at a time. The Barcode Gateway is not multi-user. If it is necessary to write to two companies or databases at the same time, it will require another license of the Barcode Gateway be purchased and set up on another workstation. Then, just as above, Dynamics SL must be running and logged into the company/database to be affected.
- The Barcode Gateway allows many Users to be set up but the number of Users able to use the Barcode Gateway concurrently is dependent on the license that was purchased.
- The Barcode Gateway is installed on a dedicated workstation somewhere on the network. This workstation can be used for other processes such as the Process Manager but should not be used for regular data entry. The Barcode Gateway software should not be installed on a server. The workstation hardware specs are the same as the recommended specs for Dynamics SL workstation.
- This solution is wireless. This is not a 'Batch' solution. If your operation makes it necessary for the users to go out of range of the Access Point, please talk to your dealer or Gulfstream about the possibility of using the Blaster module which can simulate a batch solution.
- The Access Point - 'transmitter/receiver' - is placed in a strategic place(s) in the warehouse (usually the ceiling) and is cabled into the network. The user scans the items using the recommended hardware, the transactions are picked up by the Access Point which sends the information to the Barcode Gateway through the network. The Barcode Gateway prepares a batch in the Dynamics SL module they are working in.
- Remote warehouses can easily be accommodated. Each remote site would have at least one scanner and an Access Point. The warehouse would have to be able to communicate with the central location via a WAN. The Barcode Gateway would also use the same communication. This would only require one (1) license of the Barcode Gateway as long as there was only one company/database that needs to be written to at any given time.
- Software and manuals are provided by e-mail and links to Gulfstream's FTP site. Initial and further upgrades/updates and manuals are provided easily and quickly. The MS Partner can access everything the client is entitled to. The manuals are provided in the Help section of the BG.

## Site Evaluations

Based on the size, configuration, warehouse construction material, personnel numbers as well as other variables, the number of guns, accesspoints and antennas that will provide the best coverage for each location can be determined. A site evaluation is not always necessary but can be arranged through Symbol. Please ask for more information on that. However, in consultation with our staff, it can be decided how many Access Points would be needed. We would recommend the number of Access Points based on sq.footage and other variables described above and the placement of the Access Point would be done the first day of implementation through a mini-site survey.

## Recommendations

While there are basic minimum requirements, there are also choices that can optimize an installation. We recommend using the hardware choices in our Hardware Retail Price List. We have tested our software using them and confirm that it works. We also recommend that the end user purchase a minimum of two guns and two access points/antennas to ensure redundancy. While the Motorola Symbol hardware that the Barcode Gateway utilizes is the top industry standard, if there are any problems your operation would be at a standstill until a replacement unit could be accessed.
